

## TOP-NOTCHERS IN NEW COMPANY

Prominent Provo and Salt Lake Operators Organize to Mine at Tintic.

Provo, May 30.—Articles of incorporation of the Iron King Consolidated Mining company have been filed with the county clerk. The company will conduct a general mining business with headquarters in Provo City. It has a capital stock of \$1,000,000, divided into shares of the par value of \$1 each. Three hundred and seventy thousand shares of the capital stock is set aside as treasury stock. The company owns No. 1 and 2 Iron Placer mining claims in east Tintic, the old Noon property containing 33 acres, and the Golden Chariot Nos. 1, 2, 3 and 4, mining claims to the west of the iron mines, and a vigorous campaign of development on this big property will be commenced.

## BALAKLALA COMPANY MAKES FINE SHOWING

The New York stock exchange has listed in the department of unlisted securities 11,777 shares of the Balaklala Copper company, and the listing committee recommends the further listing of 80,000 shares, when official notice has been given that this stock has been issued and is for sale in full.

The original capital of the Balaklala Copper company was \$100,000, divided into 100,000 shares at \$1 each. In March 1907, the par value was changed from \$25 to \$1, and the capital reduced from \$100,000 to \$4,000. Immediately thereafter the capital was increased from \$4,000 to \$100,000, the present authorized capital. Immediately following its incorporation in 1906, the present company purchased the entire capital stock of the Balaklala Consolidated Copper company, a Nevada corporation.

The present property is situated 25 miles north of San Francisco Bay, Shasta county, California, three miles from Coram station on the Southern Pacific railroad. There are seventy-two mining claims, aggregating 1,310 acres, in the mineral zone, exclusive of an aerial tramway, smelter site and town of Coram.

The surface is well timbered with excellent pine, and there is an abundant supply of water. Active development of the sulphide ore began in the spring of 1902.

The ore bodies are quite flat and they dip to the north, the ore being a heavy iron sulphide, carrying gold, silver and copper.

The property covers 2,000 feet on the strike of the lode. Of this distance 1,300 feet have been developed by various tunnels and drill holes. An ore body 300 feet long on the strike, and varying in thickness from twenty to fifty feet, has been developed. The actual total ore in sight is 250,000 tons, with a heavy additional estimated tonnage.

Up to April 1, 1907, the average assay of this ore ran 2.7 per cent copper, with about 40 cents gold and one ounce of silver.

The mine is being connected with the smelter by an aerial tramway, now nearly completed. It is 1,310 feet in length, and has a capacity of seventy-five tons per hour.

A smelter of 500 to 1,000 tons per day capacity is being built on the property, and will be completed next August or September. This smelter consists of three blast furnaces and one converter.

The company and its predecessor, the Balaklala Consolidated Copper company, have expended in development and tunnel construction \$1,000,000. The tramway will cost about \$125,000.

The Balaklala Consolidated Copper company has a mortgage indebtedness of \$1,000,000 first mortgage gold bonds, of which \$125,000 is due on each of the following dates: July 1, 1907; July 1, 1908; July 1, 1909; July 1, 1910.

The directors of the company are Clarence K. McCulloch, president; Edgar L. Newhouse, George W. Baird, T. M. T. Ruberg, N. A. Egbert.

## OLD PARK CITY MAN PROSPERING AT GOLDFIELD

M. C. Scully, formerly a cigar manufacturer of Park City, is one of the prominent mining operators of the Goldfield district whose name is frequently connected with affairs of moment in the big gold camp. Of his Quartzite Annex proposition, the Goldfield News has this to say:

"M. C. Scully, who last week purchased the control of the Quartzite Annex proposition, has no time in starting development work on the property. The shaft is already down thirty feet, and is being sunk as fast as two shifts of men can work. A fine looking ledge has been uncovered in the shaft, samples assaying from \$20 to \$45 a ton. Scully is well pleased with his investment and will send the shaft down to the 500-foot point, believing that with depth he will open up an immense body of shipping ore. It is possible that crosscutting will begin at the 100-foot level to cut the ledge at that point and as the ledge appears to be widening as it goes down, it is very likely that some rich values will be encountered at this level."

"The property will be fully equipped for deep development work as soon as the shaft has attained depth to warrant the installation of a galloway frame and hoist. The Quartzite Annex appears to have every advantage in the matter of location, being surrounded on all sides by proven properties, with some of the best in the district for near neighbors."

## HIGH GRADE COPPER COMING FROM BRISTOL

The Bristol Copper company is preparing to ship some very high grade ore which they have recently encountered in their workings, says the Pioche Record. This ore carries values running into the hundreds of dollars per ton. So valuable is it that in shipping it is placed in very tight wagon boxes and is double sacked.

The ore that is to be shipped is of the very highest grade, and the only reason for shipping at this time is that they have no place to keep ore of this character. When the railroad gets within hauling distance, the company will be in a position to ship carloads each day.

## FAIRVIEW MINING NOTES.

Nevada Fairview Shipping—Dromedary Hump Waiting.

The first shipment of ore from the Nevada Fairview will consist of two cars of ore running about \$300 per ton. It is now about ready for the wagons. Sacking will continue from tunnel No. 4 right along from this day on.

This has been the longest month for ore shipments; up to the 21st day of the month fourteen carloads of high-grade had been loaded at Fallon from Fairview, and the total will likely reach twenty cars by June 1. When we consider that this ore runs average cost less than \$250 to the ton, we can understand the meaning of twenty cars per month. It means that the camp is already producing money metals at the rate of more than \$1,000,000 per year.

Sam King of Salt Lake City passed through here Tuesday on his way to Lodi, where, so he states, he is interested in a valuable mining property adjoining the Illinois mine, which is at present shipping considerable high-grade ore. He further states that there is going to be a revival of mining there; a new town is to be created, with the name of Lodi. A number of properties will be worked at once, and the camp is expected to produce a number of shippers will be added to the Illinois.

The great galloway frame on the Dromedary Hump towers in the foreground. At the stay bolts are set, and the superintendent spends some of his time in chasing for forty-horse teams to haul the ore. This machinery comes not. It was reported at Fallon more than two weeks ago, but does not put in its appearance. This machinery was ordered in December, 1906; just a half year has passed since the company started to haul the ore. It is a "reasonable time." It hurts for a property like the Dromedary Hump to be held back for months, the delay is usually exasperating in this instance, because the formation there is very hard, and progress at depth is aggravatingly slow.

The property is shaped up beautifully for deep sinking, the company is in a flattering financial condition, while the ore is coming in nicely, and everything indicates a rapid production as soon as facilities for big work are afforded.

## OLD TIMER BOOSTS SOUTHERN NEVADA REGION

Joy Pollard of Rhyolite is in the city for a few days on his way to Denver. Mr. Pollard has been prospecting in the southern country for the past two years and has a number of valuable propositions individually and in partnership with other men. He is a well known and successful prospector. Mr. Pollard is an old-time Nevada man and he knows the Comstock and all of the old camps as he knows his alphabet. He states that Rhyolite, Lee, and a number of the other camps bordering the Idaho-California state line, are rapidly becoming one of the most remarkable ones. I mention it to show how the country is growing and what may be expected for the future.

"Nye county alone," said Mr. Pollard, "contains more than 100,000 acres of population within five years than the entire state of Nevada boasts at the present time. Why, a census of Rhyolite was taken the other day, and it was shown that the town had 307 children of school age. In a community where it is believed that the outside world is nothing but a desert waste inhabited by a lot of rough men and rougher women, it is not surprising that there is a remarkable one. I mention it to show how the country is growing and what may be expected for the future."

The building of the railroads in that region is changing the whole complexion of things rapidly. Machinery is rolling in, and the rapidly growing population is being thoroughly opened for heavy production. Big companies are supplying the region with water and electric power, and the whole thing is beginning to believe it or not, the fact remains that dozens of gold mines and silver mines, and copper are being put in readiness for a production that will startle the world. It takes time to make mines in any region, but I believe there is no other region on earth where it is being as rapidly done as it is right now in southern Nevada."

## KILLED SISTER AND SELF

Cora Leaderbrand Objected to Taking Care of Deaf and Dumb Child.

Springfield, Ill., May 30.—It is now deemed certain that Cora Leaderbrand, aged 17, killed her invalid sister, Carrie, aged 15, and then killed herself yesterday with the same revolver, recovered from the creek near where the bodies were found. The bodies were found in a shallow pond, nine miles north of here. It is believed that after Carrie was shot the body was thrown into the creek by Cora, who then shot herself and pitched herself into the water. The bodies of the girls, who found the bodies, said Cora complained that the incessant care of her invalid sister was an injustice to her, as it did not permit her to enjoy the companionship of other young girls. The bullet wounds were in precisely the same relative position in the temple. No other wounds were apparent.

The youngest girl was deaf and dumb.

## LIVESTOCK MARKETS.

Chicago, May 30.—Cattle—Receipts, 4,000; market 10c higher; beefs, \$4.50@4.65; cows and heifers, \$3.75@4.00; stockers and feeders, \$3.00@3.15; western cattle, \$4.25@4.40; Hogs—Receipts, 10,000; market 10c higher; light, \$5.10@5.25; mixed, \$5.00@5.15; heavy, \$4.90@5.05; pigs, \$5.00@5.10. Sheep—Receipts, 8,000; market steady; natives, \$3.25@3.40; western, \$3.25@3.40; yearlings, \$3.75@4.00; lambs, \$3.75@4.00; western, \$3.25@3.40.

Kansas City, May 30.—Cattle—Receipts, 3,000; market strong to 10c higher; native steers, \$4.50@4.65; stockers and feeders, \$3.75@4.00; calves, \$4.00@4.25; Hogs—Receipts, 12,000; market 5c higher; heavy, \$5.05@5.20; packers, \$5.10@5.25; light, \$5.15@5.30; pigs, \$5.00@5.10. Sheep—Receipts, 3,000; market steady; natives, \$3.25@3.40; lambs, \$3.25@3.40; range wethers, \$3.25@3.40; fed ewes, \$4.00@4.25.

Omaha, May 30.—Cattle—Receipts, 1,500; market active to 10c higher; native steers, \$4.50@4.65; cows and heifers, \$3.75@4.00; stockers and feeders, \$3.00@3.15; calves, \$4.00@4.25; Hogs—Receipts, 8,500; market 5c higher; heavy, \$5.05@5.20; mixed, \$5.00@5.15; light, \$4.95@5.10; pigs, \$5.00@5.10. Sheep—Receipts, 3,000; market strong; natives, \$3.25@3.40; lambs, \$3.25@3.40; ewes, \$4.00@4.25; wethers, \$3.25@3.40; fed ewes, \$4.00@4.25.

Excursions Northwest  
Via O. S. L., June 3, 7, 12 and 14; \$1.50 to Portland or Spokane and return. Limit, Sept. 30.

## HAS GOOD THING AT SILVER PEAK

Salt Lake Boy Gets Into Gold Property in Aristocratic Neighborhood.

Robert L. Hartley of this city, who was with Captain John Treweek during his managerial career at the Belle of Thunder Mountain and who retired with the Silver Peak district, Nevada. With others he has been successful in the purchase of twelve claims that are surrounded by three sides by the properties of the big Pittsburgh-Silver Peak company and the Valcaldia mines of the O'Meara syndicate.

As an evidence of the character of the property secured Mr. Hartley writes that there are two ledges crossing the property. From a quartz vein that has an average width of sixteen feet, thirty-seven tons were recently hauled to the Valcaldia mill and treated. The saving on the plates amounted to \$40,000 in silver. Eighteen assays made on samples from the iron capping of a great porphyry dyke that also runs through the ground gave returns of \$8.40 to \$28.17, the latter coming from a four-inch stringer that appears to be widening as sinking upon it.

"The Silver Peak Gold Dollar Mining company has been organized to operate the property," Mr. Hartley writes. "Mr. Hartley is president of the company and Mr. Hartley is secretary and treasurer. With the Pittsburgh company operating a 10-stake mill on one of the sides of the property, and the O'Mearas turning out gold bullion from the ground on the other side, and the fact that the company is showing millions in sight, Mr. Hartley feels that his company has a right to prominent recognition, and says that the claim of their own general manager that their property is one of the best in the country is not at all overdrawn."

## NEW CAMP OF PHONOLITE APPARENTLY HAS GOODS

In a letter to Joseph Oberndorfer, F. S. Wolcott, the most successful prospector of the new camp of Phonolite, Nev. In his letter he says:

"Keep your eye on Phonolite, Nev. It is a second Goldfield. The assay from \$32.25 to \$121.00 was struck on the Foss lease on the Amethyst Extension in the center of the Phonolite district on May 18. The ore was struck at a depth of forty feet. It is a sulphide, identical in character with that found in Goldfield. "Samuel A. King has arrived here from San Francisco with authentic news that three claims were sold to San Francisco parties by Phonolite claims. He is known as the Climax, Fourth of July and Black Mule. They brought \$90,000. These three claims were among the original discoveries in the district and had rich ore from the surface and have proven O. K."

"Our Nevada Phonolite Mining company properties are located in this belt, and placer gold has been found on the surface of the Commonwealth claim. Bruner & Co. own thirty-seven claims in this district and have an offer of \$200,000 for their entire interests. Mr. H. V. Bruner is now in Austin conferring with interested parties concerning details of the deal."

"We are without doubt in the greatest mineral bearing zone of Nevada, as our sulphide ore compare with the best in this region. You can hold your head off about Phonolite and make no mistake. It's a winner, and is sure to be one of the great camps of the future. I will send you some ore in a few days."

Will sublet classified material up to 1,000,000 YARDS.

Apply to Slick Bros., Contractors, Shoshone, Idaho.

## NO REASON TO FEAR WAR

Ambassador Creel Denies Possibility of Conflict Between Mexico and Guatemala.

Washington, May 30.—Concerning sensational reports about expectations of war between Mexico and Guatemala, Ambassador Creel of Mexico said today to the Associated Press:

"There is nothing pending and no reason for any fear of war between the two countries."

"The assassination of ex-President Barillas by a Guatemalan developed in Mexico a feeling of indignation and a strong protest by public opinion against such a criminal action, more so when it was known that General Lima from Guatemala had been located in the frontier of Mexico and Guatemala are there for the purpose of keeping order and to give protection to the people of all nationalities."

JAILED TO AWAIT TRIAL.

Birmingham, Ala., May 30.—Two men charged with embezzlement from the post-office at Anniston, Ala., were placed in jail here late yesterday. J. M. Regan, former postmaster, charged with embezzlement of \$3,077, was brought from Pucallpa, Peru, by J. M. Roberts, former clerk in the Anniston office, was brought from Los Angeles. Roberts is charged with a \$800 shortage.

SIXTY YEARS' EXPERIENCE OF AN OLD NURSE.

Mrs. Winslow's Soothing Syrup is the prescription of one of the best female physicians and nurses in the United States, and has been used for sixty years with ever-falling success by millions of mothers for their children. During the process of testing its value is incalculable. It relieves the child from pain, cures diarrhoea, griping in the bowels and wind colic. By giving health to the child it rests the mother. Price, 5 cents a bottle.
